

SPU Slippers

◆ Product Description

ESD SPU slippers are professional protective products designed for electrostatic-sensitive environments. through material innovation and process optimization, they have achieved a threefold breakthrough in static electricity dissipation, antibacterial protection, and comfortable experience.

- Precise electrostatic control
- Anti-slip and cleanliness performance
- Ergonomic design
- Antimicrobial and protective properties
- Wear-resistant and durable

◆ Product Structure

- This ESD SPU slipper uses SPU, a new-type material that integrates all the advantages of PVC and PU. The upper is designed with a six-hole ventilation system and features the "ESD" logo. The sole adopts a layered structure: the upper layer is a new-material SPU conductive cushioning layer, and the lower layer is a wear-resistant and non-slip SPU layer. It balances antistatic performance, breathable comfort, and environmental durability.

◆ Typical Applications

- This ESD SPU slipper is suitable for multiple scenarios: in semiconductor manufacturing, it prevents electrostatic breakdown of process components; in medical operating rooms and laboratories, it reduces micro-dust adsorption, and combined with a six-hole breathable design, lowers foot humidity after surgery. In laboratory R&D scenarios, the clear ESD labeling facilitates differentiation between regular slippers and anti-static equipment.

◆ Typical Product Data and Physical Properties

Material: SPU

Color: Black、Blue

Size: 36#, 38#, 40#, 42#, 44#, 46#

Season: Summer

Gender: Unisex

Functions: Dust-proof, Anti-static

Anti-static Performance: $1 \times 10^4 - 1 \times 10^9 \Omega$

Rapid Static Dissipation: $< 0.1s$
