

Palle

◆ Product Description

The pallet is integrally injection-molded from HDPE/PP materials, featuring a grid or sichuan-character structure, non-slip surface, and multi-directional forklift access. It supports a load capacity of 1-5 tons and is lighter than wooden pallets. and recyclable, it is compatible with automated storage systems. Customizable sizes and colors are available, making it an efficient and environmentally friendly modern storage solution.

- Durable material
- Grid/channel design
- Effortless handling
- Automation-ready
- Eco-friendly

◆ Product Structure

- The injection-molded pallet is integrally molded using a grid, flat, or three-beam (Sichuan-character) structure, ensuring uniform strength throughout the main body. The grid on the bottom surface enhances the anti-deformation ability, while the three-beam structure at the bottom improves stability through the support of three crossbeams. The surface is designed with anti-slip patterns to prevent the goods from sliding. The bottom supports four-way or two-way forklift entry, making it compatible with handling equipment such as forklifts.

◆ Typical Applications

- Injection-molded pallets are widely used in logistics and warehousing, food and pharmaceuticals, manufacturing, chemical and electronics, and e-commerce distribution. Their standardized sizes are compatible with automated warehousing systems, while four-way forklift access enhances handling efficiency. The hygienic and non-slip design meets the cleanliness requirements of the food and pharmaceutical industries.

◆ Typical Product Data and Physical Properties

Material: High-Density Polyethylene (HDPE) / Polyethylene (PE)
 Color: Black / Blue
 Structure type: Grid, Flat, Three-beam (Sichuan-character)
 Static load: 1–5 tons
 Dynamic load: 0.5–1.5 tons
 Rack load: 0.3–1.2 tons

Availability:

Item#	Outer size	Weight	Packaging
1.2.15.01.0339	1200*800*150MM	9.3kg	Individually
1.2.15.01.0338	1200*1200*150MM	15kg	Individually
