

Rubber Corner Protectors

◆ Product Description

Rubber corner guards, also known as wall corner protectors or anti-collision corner guards, are protective devices installed on protruding parts such as wall corners and columns. They are mainly used to protect walls, columns and vehicles, while playing a prominent warning role.

- Anti-collision Protection
- Warning Function
- Simple and Efficient
- Stable and Durable
- Environmentally Friendly and Safe

◆ Typical Product Data and Physical Properties

Material: Rubber
Color: Black
Tensile Strength: $\geq 3.5\text{MPa}$
Elongation at Break: $\geq 300\%$
Service Life: 5-10 Years

◆ Product Structure

- The main body is made of high-strength rubber or rubber-plastic composite material (with some made from recycled rubber), featuring an L-shaped or arc-shaped structure. It is fully compatible with the installation and fitting requirements of protruding parts such as wall corners and columns.

Availability:

Material Code	Product Name	Weight
1.4.24.02.0362	Rubber Corner Protectors	1.6KG

◆ Typical Applications

- Suitable for columns/wall corners, passages in industrial workshops, columns in commercial buildings (hospitals/schools/hotels), warehouse loading and unloading areas, and household children's activity areas. It is designed to protect protruding parts and prevent collision damage.
