

Granite Inspection Platform

◆ Product Description

This granite inspection platform is made of sesame white granite, solid structure, precision surface design, blackened around, with bracket, high flatness, strong stability for workpiece inspection and measurement.

◆ Product Advantages

- Sesame White Granite, Hard Texture
- Precision Surface Design, Accurate Measurement
- Solid Structure, Blackened Around, Excellent Appearance
- With Bracket, Strong Stability
- Suitable For Multiple Workpieces, Strong Practicability

◆ Product Structure

It is a solid granite structure, the precision surface is flat and smooth, the surroundings are blackened, matched with a special bracket, the bracket is firmly connected to the platform, with strong overall stability for high-precision inspection.

◆ Application Scenarios

It is suitable for factories, workshops and laboratories, used for inspection, measurement and calibration of various workpieces, precision surface ensures accuracy, solid structure and bracket ensure stability.

◆ Product Data and Physical Performance

Main Material: Sesame White Granite, Hard Texture

Precision Performance: Precision Surface, Small Measurement Error

Stability Performance: Solid Structure, Strong Stability

Appearance Performance: Blackened Around, Uniform Color

Durability Performance: Wear-resistant And Anti-damage, Not Easy To Deform

Material Code	Weight	Packaging
1.4.26.01.0017	250kg	Individually

◆ Remarks

HORB has a technical hotline to answer your technical and usage-related questions.
