

Silver Steel Bar

◆ Product Description

This silver steel bar is made of 45# steel with surface hardening treatment, high hardness and wear resistance, uniform texture and not easy to deform for mechanical processing and shaft production.

◆ Product Advantages

- 45# Steel Material, Stable And Reliable Mechanical Properties
- Surface Hardening Treatment, High Hardness And More Wear-resistant
- Uniform And Dense Texture, Not Easy To Bend And Deform
- Good Machinability, Suitable For Machining Use
- Excellent Overall Strength, Strong Load-bearing And Compression

◆ Product Data and Physical Performance

Main Material: 45# High-quality Carbon Steel, Uniform Material

Hardness Performance: Surface Hardened, High Hardness And Wear-resistant

Strength Performance: High Overall Strength, Compression And Deformation Resistant

Processing Performance: Good Machinability, Easy To Machine And Form

Stability Performance: Not Easy To Rust And Deform, Strong Durability

◆ Product Structure

It is a solid steel bar structure with uniform and dense material, surface hardened, high surface hardness and good internal toughness, regular structure for precision machining

Item	Length	Weight	Packaging
1.5.17.00.0031	915*Φ12MM	0.5kg	独立包装

◆ Application Scenarios

It is suitable for machinery manufacturing, mold processing, shaft parts and fixtures, surface hardening and wear-resistant for making transmission shafts and precision parts

◆ Remarks
