

## Black Safety Shoes

### ◆ Product Description

Black anti-static safety shoes are specifically designed for high electrostatic risk and complex working conditions. KANBO black anti-static safety shoes feature three core advantages: genuine leather texture × hardcore protection × high-efficiency conductivity, making them the standard safety equipment in industries such as electronics, chemical, and warehousing.

- High-efficiency anti-static
- Hardcore protection
- Wear-resistant and non-slip
- Breathable and comfortable
- Double physical protection barriers

### ◆ Product Structure

- KANBO Black Antistatic Safety Shoes feature a top-grain embossed genuine leather perforated upper (with conductive fibers), a PU conductive outsole (built-in anti-puncture steel plate + SRC-grade non-slip tread pattern), paired with an AN-I class steel toe cap, breathable antibacterial lining, and one-piece molding technology.

### ◆ Typical Applications

- Black anti-static safety shoes are widely used in scenarios such as electronics manufacturing, petrochemical, pharmaceutical and food industries, medical instruments, and warehousing and logistics. They release human body static electricity through conductive materials and need to be used with protective equipment while requiring regular performance inspections.

### ◆ Typical Product Data and Physical Properties

Material: Upper:Black embossed genuine leather with perforations  
+Sole Black PU

Size: 36#~46#

Single Weight: 0.65g ± 0.03

Functions: Anti-static, anti-smash

Sole Thickness:Front palm: ≥5mm Heel: ≥20mm

Toe Box Height: ≥15mm

Surface Resistance Value: 1\*10E6-1\*10E9Ω

Toe Cap Corrosion Resistance: ≤6 spots, each ≤3mm²
