

## Electrical Insulation Safety Shoes

### ◆ Product Description

Designed exclusively for live electrical work, these shoes adopt a full insulation structure to block electric current effectively. With anti-impact and wear-resistant performance, they fit electrical-related scenarios and prevent electric shock risks from the source.

### ◆ Product Advantages

- High-voltage electrical insulation
- Anti-impact protection
- Full insulation structure
- Anti-slip & fold-resistant
- Exclusive for electrical work

### ◆ Product Structure

The upper, midsole and outsole feature a fully insulated and sealed design, with a built-in anti-impact steel toe cap and no exposed conductive parts. The insulation layer is evenly covered, the shoe shape fits firmly and complies with insulation protection structure standards strictly.

### ◆ Application Scenarios

Suitable for power maintenance, substation operation, electrical equipment installation, factory live operation and other scenarios. They meet the requirements of low/high voltage insulation work and reduce electric shock hidden dangers.

### ◆ Technical Features

Insulation withstanding voltage 6kV/1min compliant.

Excellent surface insulation resistance

Anti-impact resistance: 200J
