

Safety Shoes

◆ Product Description

Safety shoes are professional protective equipment developed for high electrostatic risk and complex working environments. Integrating electrostatic control, mechanical protection, and ergonomic design, they provide reliable foot safety protection for multiple industries through authoritative certifications.

- Electrostatic control technology
- Full-dimensional mechanical protection
- Three-layer composite upper
- Dual-density outsole
- Breathable and comfortable design

◆ Product Structure

- The upper of the safety shoe features a three-layer composite structure: imported embossed cowhide with anti-stain treatment + antibacterial lining + skin-friendly microfiber suede, paired with a padded tongue. The dual-density outsole includes a wear-resistant and slip-resistant rubber outer sole and a PU foam cushioning midsole. It is equipped with a built-in 3D molded breathable insole, making the entire shoe lightweight and certified by authoritative bodies.

◆ Typical Applications

- Safety shoes are suitable for scenarios such as electronic manufacturing, chemical and petroleum industries, mechanical and construction sectors, medical and pharmaceutical fields (with antibacterial and dust-proof requirements), etc., through multi-dimensional protection, they meet the needs of high-risk operations in various fields.

◆ Typical Product Data and Physical Properties
