

Safety Shoes

◆ Product Description

Safety shoes are all-season work shoes that balance professional protection with everyday comfort, specially designed for scenarios such as industrial operations and outdoor construction. They adopt a high-top structure to enhance ankle protection, coupled with core safety features of impact resistance and penetration resistance; meanwhile, the wear-resistant and breathable materials as well as shock-absorbing design make them suitable for the needs of professional scenarios including construction sites and workshops.

- High-top Three-dimensional Protective Structure
- Dual Professional Safety Protection
- All-season Breathable and Comfortable Design
- Wear-resistant and Slip-resistant Rubber Outsole
- Workwear-style Multi-scenario Compatibility

◆ Product Structure

- The safety shoes adopt a modular structural design. The upper is made of spliced wear-resistant canvas and synthetic leather; the high-top upper is paired with a steel toe cap, breathable lining and adjustable lace system. Embedded with two core protective components—steel toe cap and Kevlar puncture-resistant midsole the shoes deliver reliable defense against hazards. The midsole is crafted with a high-elastic EVA cushioning layer, while the outsole is a high-wear-resistant rubber anti-slip sole. Complemented by detailed designs such as heel pull tabs and reinforced stitching, the overall structure balances professional protection, wearing comfort and durability.

◆ Typical Applications

- The safety shoes are widely applicable to professional work scenarios such as industrial workshops, construction sites, logistics and warehousing, and automotive maintenance and repair. Meanwhile, their workwear style also meets the needs of daily commute wear, enabling seamless switching between work and daily life scenarios.

◆ Typical Product Data and Physical Properties

Upper Material: Spliced Wear-resistant Canvas + Synthetic Leather

Core Protective Components: Steel Protective Toe Cap

Midsole: Kevlar Fiber Layer

Midsole: High-elastic EVA Material

Outsole: High-wear-resistant Rubber

Function: Impact & Penetration Resistance

Coefficient of Friction: ≥ 0.7

Puncture Resistance Force: $\geq 1100\text{N}$

Impact Resistance Performance: $\geq 200\text{J}$

Availability:

Item#	Color	Size	Packaging	Weight
1.1.04.08.1560	Khaki	36#	1 pair/box 10 pairs/carton	2kg
1.1.04.08.1561	Khaki	37#	1 pair/box 10 pairs/carton	2kg
