

ESD Anti-Fatigue Mats

Product Description

This anti-static anti-fatigue mat is made of high-quality rubber material, with both anti-static and anti-fatigue functions, non-slip, wear-resistant and elastic to relieve standing fatigue.

Product Advantages

- Rubber Material, Flexible, Wear-resistant And Not Easy To Age
- Anti-static Qualified, Stable Protection Performance
- Excellent Elasticity, Effectively Relieve Standing Fatigue
- Non-slip Surface, Ensure Operation Safety
- Easy To Clean, Suitable For Multi-environment Placement

Product Structure

It is an integrally formed rubber structure, with anti-static and non-slip surface, high-elastic anti-fatigue middle layer, non-slip bottom, thick and stable for protection and comfort.

Application Scenarios

It is suitable for anti-static areas such as electronics factories, used for operators to stand, relieving fatigue and releasing static to ensure personnel and equipment safety.

Technical Features

Main Material: High-quality Rubber, Flexible And Wear-resistant
 Anti-static Performance: Stable Resistance, Can Quickly Release Static Electricity
 Elastic Performance: High Elastic Rebound, Relieve Standing Fatigue
 Surface Performance: Non-slip, Wear-resistant And Easy To Clean
 Usage Performance: Not Easy To Deform, Durable

Item#	Size	Weight	Packaging
