

## Disassembly Card

### ◆ Product Description

Made of flexible PC material, uniform thickness, smooth edges without burrs, not easy to break, used to pry open gaps between screens and casings during electronic equipment disassembly, avoiding scratches on the body and components.

### ◆ Product Advantages

- Material: Flexible PC material
- Smooth edges without burrs
- Not easy to break and bend-resistant
- Uniform thickness, suitable for gaps
- No scratches on body components

### ◆ Technical Features

Material: Flexible PC  
 Size: 80×20×0.3mm  
 Bending angle: ≤120° without breaking  
 Temperature resistance range: -5°C~60°C  
 Surface roughness: Ra≤0.2μm

### ◆ Product Structure

One-piece flexible PC molding, no splicing, smooth card surface, precision polished edges, uniform thickness, light weight, easy to insert into small gaps and pry.

Material code	weight	packaging method	specification
1.2.07.02.0024	1.05kg	100个/盒	8.5CM*5.3CM*0.35mm

### ◆ Application Scenarios

Widely used in the disassembly and maintenance of electronic devices such as mobile phones, tablets, computers and cameras, to pry open gaps between screens and middle frames, casings and motherboards, it is an essential auxiliary tool for disassembly.
