

Stirring Rod

◆ Product Description

This product is a slender stirring rod with moderate size and a smooth, uniform rod body. It is suitable for liquid mixing, laboratory stirring, cosmetic preparation and other scenarios, featuring convenient, clean and hygienic use.

◆ Product Advantages

- Moderate size, comfortable to hold
- Pack of 10, economical and practical
- Smooth surface, easy to clean
- Solid texture, not easy to break
- Versatile for multiple scenarios, high applicability
-

◆ Product Structure

It features a slender, cylindrical straight rod structure with uniform thickness throughout. Without redundant parts, it has an overall smooth surface free of burrs and rounded ends. The design is simple and practical, allowing easy access into containers for stirring.

◆ Application Scenarios

Suitable for stirring laboratory reagents, mixing cosmetic raw materials, stirring beverages, blending pigments, and homogenizing liquids in small containers, etc., meeting daily and experimental stirring requirements.

◆ Technical Features

- Made of high-quality heat-resistant plastic
- Moderate hardness, not easy to deform during stirring
- Smooth surface with no liquid adhesion, easy to clean
- Acid, alkali and corrosion resistant, suitable for various liquids
- Eco-friendly and non-toxic, safe and reliable to use
