

Plastic Bucket

◆ Product description

The plastic buckets are injection molded from food-grade or industrial-grade raw materials, featuring excellent sealing performance, leak-proof and corrosion-resistant properties, being lightweight and easy to move, and suitable for storing various materials.

◆ Product advantages

- Sealed and leak-proof
- Corrosion-resistant and shock-resistant
- Lightweight and portable
- Environmental and non-toxic
- Durable

◆ Product Structure

It is composed of a bucket body, a bucket lid and a sealing rubber ring. The bucket body is integrally formed without seams, and the bucket lid is designed with a snap-on structure. The structure is reasonable and has strong load-bearing capacity.

◆ Application scenarios

It is used for the storage and transportation of materials such as food seasonings, chemical reagents, drinking water, and agricultural irrigation, and is suitable for industries such as food, chemicals, and agriculture.

◆ Product Features

Texture: HDPE/PP

Capacity: 5-200L

Wall thickness: 2-8mm

Temperature resistance: -20~80°C

Compressive strength: ≥1000N

Product code	Color	Size
1.2.15.01.0585	white	55*42*63CM
