

Feeding & Discharging Bucket

◆ Product Description

The feeding & discharging bucket is specially designed for convenient material discharge. The discharge port is located on the top of the bucket body and is equipped with a control valve, ensuring smooth discharge and easy operation. It is suitable for continuous feeding scenarios.

◆ Product Advantages

- Smooth discharge
- Easy to operate
- Well sealed
- Stable feeding
- Easy to clean

◆ Product Structure

It is composed of a barrel body, an upper discharge port, a control valve and a bracket. The barrel body is thickened, the discharge channel is smooth, the control valve is tightly sealed and the structure is stable.

◆ Application Scenarios

It is applied in industries such as chemical engineering, food, building materials, and pharmaceuticals, and is suitable for continuous feeding of powder and liquid materials, such as workshop production lines and batching processes.

◆ Product Features

Capacity: 3L
Temperature resistance: -10~70°C
Bearing: ≤500kg

Product code	Color	Capacity
1.2.15.01.0586	Silver	3L
