

Plywood Pallet

◆ Product Description

Plywood pallet is an eco-friendly and durable logistics carrying equipment. It is made by gluing and pressing multiple layers of solid wood veneers together, with a smooth and flat surface. It can stably carry various types of goods and is suitable for logistics turnover and storage in multiple scenarios.

◆ Product advantages

- Eco-friendly and formaldehyde-free, green and safe
- It has strong load-bearing capacity and is not prone to deformation
- Waterproof and moisture-proof, suitable for humid environments
- Smooth and flat, easy to stack
- Customizable size and strong adaptability

◆ Product Structure

It is made by cross-gluing multi-layer solid wood veneers and then pressed under high temperature and high pressure. The edges are reinforced and anti-slip feet are set at the bottom. The overall structure is stable, with no risk of loosening and uniform load-bearing force.

◆ Application Scenarios

It is widely applied in industries such as warehousing and logistics, food processing, electronic appliances, pharmaceuticals and chemicals, and is suitable for goods stacking, turnover transportation, and warehouse storage. It can be used in conjunction with forklifts and shelves to enhance logistics efficiency.

◆ Product Features

- Single-piece load-bearing: 800-1500kg
- Moisture content: 8%-12%
- Temperature resistance: -5°C~60°C
- Service life: 5-8years

Item#	Size	Weight
1.2.15.01.0591	1250x1050x110MM	16kg
1.2.15.01.0592	1050x1050x120MM	15kg
1.2.15.01.0593	1200*1200*124MM	18kg
1.2.15.01.0594	1200*1000*100MM	14kg
1.2.15.01.0595	1100x1100x120MM	16kg
