

## Sponge For Welding Electrode

### Tip Cleaning

#### ◆ Product description

Sponge wiping covered electrode head is specially designed for cleaning welding operation, which can quickly clean welding head oxide layer and residue without damaging welding nozzle, keep smooth heat conduction, and improve welding quality and service life of soldering iron.

#### ◆ Product advantage

- Quick cleaning does not hurt the welding nozzle
- High temperature resistance and no slag dropping.
- Water absorption and storage stability
- Suitable for all kinds of electric soldering irons
- Durable and easy to replace

#### ◆ Product structure

It is composed of high-density high-temperature resistant sponge and plastic base. The sponge has uniform pores, sufficient water storage, and the base is non-slip and stable. It can be placed on the workbench and has a simple structure and easy use.

#### ◆ Application scenario

Widely used in electronic maintenance, PCB welding, factory production line, laboratory welding, home appliance maintenance and other scenes to keep welding head clean and ensure welding accuracy.

#### ◆ Product characteristics

Sponge Material: High Temperature Resistant Cleaning Sponge

Base Material: Hard Engineering Plastic, Sturdy And Stable

Cleaning Performance: Strong Adsorption

Water Absorption Performance: Good Water Absorptio

Usage Performance: Friction Resistant

Item#	colour	measure	packing
1.3.07.05.0069	yellow	60*60*10MM	Individually
