

## Binder Clip

### ◆ Product Description

A binder clip is a portable office stationery used for securing and organizing paper documents. With its simple operation and flexible adaptability, it has become a fundamental tool for document management in office, study, and home settings. Its core value lies in enabling organized storage, quick categorization, and easy access to documents, thereby effectively improving the efficiency of data organization.

- Convenient and Efficient Operation Experience
- Flexible Adaptability and Versatile Scenario Compatibility
- Durable and Long-Lasting Structural Stability
- Damage-Free Protection and Document-Friendly Design
- Cost-Effective and High Value-for-Money Performance

### ◆ Product Structure

- The structure of binder clips is centered around "functional adaptation" and divided into two major modules: the universal basic structure and the type-specific structure.

### ◆ Typical Product Data and Physical Properties

Product Material: Metal

Universal Core Performance: Binding thickness range: 5mm - 50mm

Metal-Specific Performance: Tensile strength  $\geq 300\text{MPa}$

Physical Properties: Wear resistance, oxidation resistance

#### Availability:

Item#	Spec	Color	Packaging	Weight
1.3.11.16.0002	8cm	Silver	50 pieces per box	0.7kg

### ◆ Typical Applications

- As an efficient document organizing tool, binder clips are widely used in multiple scenarios such as workplace offices, campus learning, household life, and freelancing comprehensively meeting the needs of different groups for document organization and information sorting.
