

Fire Hydrant Box

◆ Product Description

The Fire Hydrant Cabinet (FHC) is a core fire-fighting equipment storage box in building fire protection systems. Equipped with fire hydrants, hoses, nozzles, and other equipment, it is wall-mounted in public areas, featuring strong protection and easy access.

- Equipment Storage
- Easy Installation
- Reliable Protection
- Quick Access
- Wide Compatibility

◆ Typical Product Data and Physical Properties

Material: Cold-rolled steel plate/flame-retardant ABS

Color: Red

Structural Performance: 20/25m hose + DN50/65 nozzle

Protection Class: IP30-IP54

Environmental Adaptability: -10°C ~+55°C

◆ Product Structure

- The fire hydrant cabinet is made of cold-rolled steel plate or flame-retardant ABS plastic with sealed protection design, featuring internal layered storage or hoses, nozzles and fire hydrants, a convenient opening mechanism, red warning signs, and reserved wall-mounted fixing holes on the back, with a compact, protective and practical structure.

Availability:

Material Code	Product Name	Weight	Packing
1.4.24.01.0259	Fire Hydrant Box	0.6KG	1 set/ctn

◆ Typical Applications

- Suitable for various commercial buildings, industrial facilities, civil buildings, and crowded or fire-critical areas such as subway stations, airports, and underground garages, it is installed in public areas like corridors, stairwells, and fire exits to provide storage and quick access to fire-fighting equipment (fire hydrants, hoses, nozzles) for emergency fire suppression.
