

## Magnetizer

### ◆ Product Description

Specially designed for screwdriver heads, it can quickly achieve bidirectional operations of magnetization and demagnetization, improving the efficiency of screw disassembly and assembly. It is compatible with various specifications of screwdrivers and is an essential portable tool for electronic maintenance.

### ◆ Product Advantages

- Dual functions of magnetization and demagnetization
- Strong magnetic attraction
- Compatible with multiple specifications of batch heads
- Compact in size and easy to carry
- The operation is simple and efficient

### ◆ Product Structure

Made of high-strength wear-resistant material in one piece, it is equipped with a high-magnetic core inside, and the shell is treated for anti-slip. The overall design is compact, thin and light, without any redundant designs. It is convenient to operate handheld and does not take up much space.

### ◆ Application Scenarios

It is suitable for the repair of electronic devices such as mobile phones, computers and home appliances. The screwdriver head can be quickly magnetized to prevent screws from falling off. It is suitable for scenarios such as repair shops, personal disassembly and factory maintenance.

### ◆ Technical Features

The model of the demagnetizer is SYT-516. After demagnetization, the adsorption is stable, demagnetization is thorough, it is wear-resistant and not easy to deform, and the operation is convenient.

Item Code (SKU)	Weight ( kg )	Packing Detail
1.5.09.00.0015	0.086	1pc/box
